A. N. Shotwell, of the Colonial, the city's leading institution, a hotel with 200 rooms and large bath houses, using mineral water from their own private wells.

Dr. Shotwell is the head of a staff of physicians who have made a special study of the waters of Mt. Clemens. These springs have been known ever since the white man settled in Michigan, and enjoyed quite a reputation among the Indians, who made regular journeys to them.

The waters have been examined by physicians from all parts of the world and have always been found to contain rich deposits of various kinds of minerals.

The climate of this section of the State is said to be most desirable, being cool in summer and not too cold in winter. Its proximity to the lakes makes it an ideal location for an institution of this kind and the opportunities for recreation are unlimited.

Desperate Diet.

There is naturally much talk in winter of rationing and food supply, and the possibility or probability of starving out one or other of the belligerents. But it is amazing what people will eat at a pinch.

A recent Arctic explorer seriously advised the wearing of skin clothing in preference to woolen, simply and solely because, if the worst came to the worst, one's outfit could be stewed for a meal, or at any rate given to the dogs.

Well, when a man finds enjoyment and a sort of inward satisfaction in a stew made of his vest, his shoelaces, and his sledge-gear, he must be pretty "peckish," and when he gets back to civilization he will make a model husband, never likely to turn up his nose at cold mutton on washing days.

Discolored or Spotty Skin Easily Peeled Off

The freckling, discoloring or roughening to which most skins are subject at this season, may readily be gotten rid of. Mercolized wax spread lightly over the face before retiring and removed in the morning with soap and water, completely peels off the discolored skin. Get a ounce of the wax at any druggist's. There's no more effective way of banishing tan, freckles or other cutaneous defects. Little skin particles come off each day, so the process itself doesn't even temporarily mar the complexion, and one soon acquires a brand new, spotless, gloriously beautiful face.

Wrinkles caused by weather, worry or illness, are best treated by a simple solution of powdered axolite—one ounce dissolved in one-half pint witch hazel. Bathing the face in this produces a truly marvelous transformation.—Adv.
